

Domain	Acronym	Capability Name	Source	Description
Analytics & Reporting	ABI	Embedded BI & Dashboards	Expert Addition	Embedded analytics within CRM workflows and portals (CRM Analytics / Tableau Embedded) for in-context decision support without leaving the app — surfacing insights where work happens.
Analytics & Reporting	AEX	Einstein Conversation Insights (ECI)	Expert Addition	AI analysis of sales and service call transcripts to surface coaching signals, competitive mentions, deal risk flags, and rep performance patterns — actionable intelligence from every customer conversation.
Analytics & Reporting	APC	Tableau Pulse / Proactive Insights	Expert Addition	AI-driven, push-based metric monitoring that surfaces anomalies and signals to business users without requiring them to build or run reports — Salesforce's answer to proactive analytics.
Analytics & Reporting	ARI	Revenue Intelligence	Expert Addition	AI-driven pipeline health scoring, deal risk signals, and forecast accuracy analysis layered on top of CRM data — distinct from basic Sales Analytics and purpose-built for sales leadership decision-making.
Billing	BCC	Credit & Collections	V1.3 Capability Cards	The receipt of payments and the crediting and debiting of accounts, as well as the management of disputes and overdue accounts including process for dunning, notification, charge off, refunds, etc.
Billing	BIM	Invoice Management	V1.3 Capability Cards	The generation and distribution of amount due, due date and additional bill detail to customer over channel of choice.
Billing	BLL	Billing Management	V1.3 Capability Cards	The process of rating or calculating the amount to charge customers for products and services provided, across all required billing scenarios.
Billing	BRR	Revenue Recognition	V1.3 Capability Cards	Manage and apply revenue recognition rules to create revenue transactions to be entered into a general ledger.
Collaboration	CAF	Agentforce in Slack	Expert Addition	Deployment of AI agents natively within Slack channels and DMs — enabling employees to invoke agents, receive AI summaries, and execute CRM actions entirely within their collaboration flow.
Collaboration	CSC	Slack Connect / External Collaboration	Expert Addition	Secure cross-company channel collaboration with customers, partners, and vendors — enables digital account rooms, shared deal workspaces, and partner onboarding experiences beyond the firewall.
Collaboration	CTC	Asynchronous Team Collaboration	Expert Addition	Persistent channel-based messaging, huddles, and workflow execution connecting people, tools, and partners securely.
CPQ	CCM	Product Catalog Management	V1.3 Capability Cards	Ability to maintain a product and service catalog, supporting solution bundles and multiple catalog versions. Catalogs should have the ability to manage and edit products and associated data.
CPQ	CPL	Proposal Management	V1.3 Capability Cards	Ability to manage the proposal creation and delivery process. Proposals can be initiated from scratch or via an existing Quote, by multiple authorized roles, using standard Templates & Terms, and providing electronic signature capabilities.
CPQ	CPM	Pricing Management	V1.3 Capability Cards	Ability to flexibly manage the pricing of product & service offerings. All pricing strategies are supported via pricing rules.
CPQ	CQM	Quote Management	V1.3 Capability Cards	Ability to manage the creation and delivery of product & service quotes to customers. This includes an easy way for customers, sales reps, partners, etc. to construct product bundles, create multiple versions of quotes, and review with customers.
CPQ	CSC	Guided Solution Configuration	V1.3 Capability Cards	Ability to establish a set of rules and policies to guide sales reps, partners, and customers through the process of selecting the correct product & service for their requirements.
CPQ	CSM	Subscription Management	V1.3 Capability Cards	Ability to manage one-time, usage, and recurring services of varying term lengths as well as handle all transaction types in the lifecycle of a contract.
Data & AI	DAG	Agentic AI / Autonomous Agents	Expert Addition	Deployment and governance of autonomous AI agents that can reason, plan multi-step actions, invoke external tools and APIs, and hand off to humans — the Agentforce core motion. Distinct from copilot/assist patterns.
Data & AI	DDH	Data Harmonization	Expert Addition	Processing and mapping of structured and unstructured data from external systems into a standardized data model (e.g., Data Cloud) for analytics and activation.
Data & AI	DEL	Einstein Trust Layer	Expert Addition	Governance layer for all AI interactions: zero data retention, PII masking, prompt/response audit logging, toxicity detection, and data grounding — the enterprise trust wrapper required for regulated and global deployments.
Data & AI	DFC	Flex Credit & AI Consumption Management	Expert Addition	Management and metering of consumption-based AI and Data Cloud credits across business units, subsidiaries, and use cases — critical for SELA and large multi-org enterprise deployments.
Data & AI	DGA	Generative AI Orchestration	Expert Addition	Management of AI models, prompt templates, and autonomous agent actions to orchestrate generative AI seamlessly and securely into workflows.
Data & AI	DIR	Identity Resolution	Expert Addition	Creation of unified customer profiles from disparate data sources and matching rules to build a single source of truth for the customer.
Data & AI	DPA	Predictive AI / Einstein Scoring	Expert Addition	Supervised ML models for scoring, classification, and forecasting (lead scoring, churn prediction, CSAT likelihood) embedded natively in CRM records, flows, and dashboards.
Data & AI	DUP	Unified Customer Profile	Expert Addition	Real-time, cross-source 360° profile assembly for individuals and accounts — the Data Cloud output that powers personalization, segmentation, and agent context grounding.
Data & AI	DVS	Vector Search & RAG Grounding	Expert Addition	Retrieval-Augmented Generation using unstructured data (PDFs, emails, docs, knowledge bases) vectorized and stored for semantic search — the trusted data foundation for accurate and grounded agent responses.
Field Service	FAP	Field Service Analysis & Planning	V1.3 Capability Cards	The operational reporting and optimization analysis of field service resources, inventory and assets, as well as customer work order completion and satisfaction.
Field Service	FDR	RMA / Depot Repair	V1.3 Capability Cards	Management of diagnosis, remediation workflow, repair depot assignment, shipping, swap-out / loaner replacement, repair, and post repair financial and inventory reconciliation.
Field Service	FIR	Field Inventory & Replenishment Management	V1.3 Capability Cards	Manage inventory levels across locations, track availability of parts, request for parts, and record parts used to complete work orders.
Field Service	FMO	Field Worker Mobility	V1.3 Capability Cards	Ability for field employee to complete key work functions while remote in the field.
Field Service	FFM	Install Base & Preventative Maintenance	V1.3 Capability Cards	Manage installed assets for each customer location, including company installed, existing, and 3rd party products/systems. Establish proactive scheduled plan to service install base.
Field Service	FRM	Resource Management	V1.3 Capability Cards	The development and management of the individuals who perform field work, including the skills, capacity and availability of the resources.
Field Service	FSM	Operational Schedule Management	V1.3 Capability Cards	Allocation of resources to work in the most efficient way possible by accounting for field employee skill level, travel time, location, and other factors.
Field Service	FWO	Work Order Management	V1.3 Capability Cards	Work orders define the discrete pieces of work needed to complete a job. Work orders are defined by status and service related entitlements.
Industry Solutions	ICR	Industry Rules Engine	Expert Addition	Management of complex, industry-specific business rules, digital processes, and document generation (e.g., OmniStudio) natively mapped to Salesforce objects.
Industry Solutions	IDI	Digital Engagement & Self-Service (Industry)	Expert Addition	Industry-specific customer portal and self-service for technical support, licensing entitlement, and renewal management — especially relevant to DISW's support and renewal motion for software subscription customers.

Domain	Acronym	Capability Name	Source	Description
Industry Solutions	IMP	Manufacturing & Asset Lifecycle Management	Expert Addition	Management of product lifecycle, installed base, and asset genealogy tied to customer accounts — core to B2B industrial software companies managing complex customer install bases like DISW's Xcelerator portfolio.
Integration	IAF	Agent-to-Agent (A2A) Orchestration	Expert Addition	Coordination of multiple specialized AI agents via a supervisor/orchestrator pattern — enabling cross-domain agentic workflows (e.g., Sales Agent + ERP Agent + Service Agent). MuleSoft Agentfabric is the underlying platform layer.
Integration	IAM	API Management	Expert Addition	Lifecycle management, securing, and governance of application programming interfaces across the enterprise ecosystem.
Integration	IEI	Enterprise Integration	Expert Addition	Orchestration of data and processes across disparate enterprise systems, enabling composable architecture and flow automation.
Integration	IEP	Enterprise Platform Connectors	Expert Addition	Pre-built connectors to key enterprise systems (SAP, Oracle, ServiceNow, Workday) for bidirectional data sync and action execution — MuleSoft's Anypoint Exchange connector library as a managed capability.
Integration	IMS	Microsoft Ecosystem Integration	Expert Addition	Native bidirectional integration with Microsoft 365 (Teams, Outlook, SharePoint, Copilot) — critical for enterprises with MS-centric internal tooling and for embedding Salesforce actions in Teams workflows.
Marketing	MAS	Audience Segmentation & Activation	V1.3 Capability Cards	Clustering of a broad audience into a subgroup based on some type of shared characteristics, such as needs, interests, lifestyles or demographic profiles. The goal being to identify a high yield target market, and/or to treat with a differentiated campaign, tactic or program.
Marketing	MCN	Content Management	V1.3 Capability Cards	A set of processes and technologies that supports the collection, managing, and publishing of marketing assets and information for any channel or medium.
Marketing	MDI	Direct Marketing (owned)	V1.3 Capability Cards	The promotional method across communication channels that involves presenting personalized, contextual information about your company, product, or service to your target prospect without the use of an advertising middleman.
Marketing	MJM	Journey Management	V1.3 Capability Cards	The coordinated series of steps that promote an action, engagement or awareness through different channels and mediums. The management of budget, goals, audience and outcome for a campaign, program or tactic.
Marketing	MLG	Lead Generation	V1.3 Capability Cards	The capture, processing and nurturing of a potential customer with an interest that's aligned with or influenced by marketing campaign efforts. Leads typically require further qualification of identity and intent.
Marketing	MMA	Marketing Analytics	V1.3 Capability Cards	The analysis of the effectiveness of marketing campaigns and assets to determine how well they achieve their objective versus the cost. Measurement to support Performance-Based Marketing goals.
Marketing	MPA	Paid Marketing (ads)	V1.3 Capability Cards	Sponsored (paid) promotional method across communication channels and media type about your company, product, or service to your target prospect with the use of an advertising partner.
Marketing	MPV	Preference & Privacy Management	V1.3 Capability Cards	Comply with regional data regulations providing customers the ability to manage consent across channels, by content category. Honor preferences across communications and other processes. Support the right to be forgotten and the portability of customer data.
Marketing	MSP	Marketing Strategy & Planning	V1.3 Capability Cards	The analysis of how a brand is perceived in the market, and the strategy to improve the perception, differentiate from competitors and attack new markets. The administration, collaboration and coordination of marketing programs, scheduling, resourcing and budgeting.
Order	OAS	Assisted Sales & Service	V1.3 Capability Cards	Provide a customer sales or service agent with the same experience and actions as the customer, and enable agents with additional capabilities.
Order	OCF	Order Capture	V1.3 Capability Cards	Ability to collect all details related to customer order including product, quantity, pricing and applying any business rules related to the order.
Order	OCS	Commerce Self Service	V1.3 Capability Cards	Ecommerce channel that supports order capture / checkout that optimizes the purchase path and experience of the user.
Order	OIM	Inventory Management	V1.3 Capability Cards	Manage and track product supply levels and status across channels and locations.
Order	OPM	Promotion Management	V1.3 Capability Cards	Management of purchase incentives, in concert with campaigns, across channels, targeting specific customer segments. Promotions must be processed at purchase and honor eligibility and qualification.
Order	ORE	Recommendations & Experience	V1.3 Capability Cards	Management of a customer's personalized experience including branding, theming, as well as product/item/content in context to user, experience and device.
Order	ORM	Order Management	V1.3 Capability Cards	Management of filling orders from distribution center, sourcing inventory, shipping orders to customer with owned or un-owned inventory, and provide notification and visibility of order status.
Order	OSM	Search / Merchandising	V1.3 Capability Cards	Tools to control and optimize how customers search and engage with products and content.
Order	OSP	Shipping & Payment Methods	V1.3 Capability Cards	Define and Manage order processing requirements such as shipping methods, shipping costs, payment types, and taxes.
Partner	PDG	Partner Development & Growth	V1.3 Capability Cards	Manage partner learning, training, certifications and programs. Certifications reflect the breadth of partner's skills across certain domains.
Partner	PJM	Joint Partner Marketing	V1.3 Capability Cards	Partnership to market our products. Planning, managing funds, designing co-branded materials, launching joint campaigns and managing events together and collaborating on leads.
Partner	POM	Partner Order Management	V1.3 Capability Cards	Partnership to fulfill orders for out products. If a distributor is involved, managing point of sales data.
Partner	PRO	Partner Recruitment & Onboarding	V1.3 Capability Cards	Enablement of fast and effective onboarding of partners, partnership contract / agreement that defines partnership relationship, managing partner's contacts, locations, another pertinent partner attributes.
Partner	PSM	Partner Sales Management	V1.3 Capability Cards	Partnership to sell our products. Sharing sales life cycle with partners, planning with partner account managers, collaborating on opportunities, managing discounts and promotions.
Partner	PVM	Partner Service Management	V1.3 Capability Cards	Partnership for post-sale activities including managing rebates, satisfaction surveys, feedback, case resolution, performance and recognition.
Platform & Governance	PGV	Data Governance & Privacy	Expert Addition	Management of data access controls, consent, GDPR/CCPA/global compliance, field-level security, and data residency policies — foundational for global enterprise deployments like Siemens.
Platform & Governance	PMD	Multi-Org / Subsidiary Architecture	Expert Addition	Patterns and tooling for managing multiple Salesforce orgs (Home Org, Companion Orgs, subsidiaries) — directly relevant to DISW's structure under the Siemens SELA and Enterprise License Agreement.
Platform & Governance	PNZ	Net Zero / Sustainability Management	Expert Addition	Carbon accounting, emissions tracking, supplier sustainability data management, and ESG reporting — increasingly required for Siemens' global sustainability obligations and reporting frameworks.
Sales	SAM	Account Management	V1.3 Capability Cards	Tools & strategies used to build relationships with customers, consumers or partners. Ability to manage details & related information regarding a Company or Company Division once identified.
Sales	SCL	Contract Lifecycle Management	V1.3 Capability Cards	Ability to create, manage, track & automate sales agreements defining terms of business between business parties on accounts and opportunities. The tracking of them through approval, renewal, and document management processes.
Sales	SCM	Contact Management	V1.3 Capability Cards	Ability to acquire, store, manage, search, communicate and track engagement with individuals associated with accounts. Can be business or individual people connections and provides an integrated picture of individuals.
Sales	SCP	Compensation Management	V1.3 Capability Cards	The management and maximization of sales team performance by driving the right behaviors through incentive compensation.

Domain	Acronym	Capability Name	Source	Description
Sales	SCU	Cross / Up-Sell Management (Sales)	V1.3 Capability Cards	Manage product up sell and cross sell during sales process. Visibility into sales information providing ability to identify new revenue generating opportunities.
Sales	SDS	Deal Support Requests	V1.3 Capability Cards	Mechanisms to managed flow of incoming enablement requests to facilitate, route, assign and escalate the need to collaborate on efforts that support a sales opportunity.
Sales	SEM	Sales Enablement	V1.3 Capability Cards	Manages information, content, plays and recommendations around competitors and supports SME collaboration for enablement.
Sales	SGS	Guided Solution Selling	V1.3 Capability Cards	Ability to provide a prescriptive approach to selling to determine best-fit products, suggest engagement actions, identify alignment to organizational best practices and process, and engage broader teams on opportunities to promote team based selling process.
Sales	SIS	Inside Sales Management	V1.3 Capability Cards	Management of sales that provides internal sales reps with rapid access to customer identifying information to engage with customers via activities like inbound campaigns or outbound outreach. Engagement primarily via phone or other virtual channels rather than in-person.
Sales	SLM	Lead Management	V1.3 Capability Cards	A set of methodologies, systems, and practices designed to generate, score, prioritize, and qualify new potential business.
Sales	SOP	Opportunity Management	V1.3 Capability Cards	Ability to manage the potential sale of products and/or services to a customer or partner in order to generate revenue against a forecasted quota across a defined execution process.
Sales	SPR	Product Management (Basic)	V1.3 Capability Cards	Management of the setup and application of products used in the sales process(es) when creating opportunities or when executing on CPQ operations.
Sales	SSA	Sales Analytics	V1.3 Capability Cards	Management of insights and data analytics associated with the sales process.
Sales	SSP	Sales Performance Management	V1.3 Capability Cards	Manage and monitor enterprise sales projections that align to monthly or quarterly quotas and goals assigned to one or more sales team member(s). Forecasts are collaborative to allow sales teams to monitor, share, and adjust them with maximum flexibility and visibility.
Sales	STM	Territory Management	V1.3 Capability Cards	Management of Sales Territories including criteria-based sharing, membership, and sales structure.
Service	VAI	Predictive Service	V1.3 Capability Cards	Automation of support processes for customers, agents and supervisors using artificial intelligence.
Service	VAX	Unified Agent Experience	V1.3 Capability Cards	Workspace that allows for the interaction with multiple contextual channels and records on a single screen, and minimizes clicking and scrolling so users can quickly take action.
Service	VCH	Omni-Channel Contact Center	V1.3 Capability Cards	Ability to manage interactions between service requester and provider from a variety of customer service channels.
Service	VCM	Case Management	V1.3 Capability Cards	Management of the lifecycle of a service request through to resolution, including the ownership of the inquiry, traceability of resolution, and related interactions.
Service	VEN	Service Contract Management & Entitlement	V1.3 Capability Cards	Management of a customer's entitlement to service, including the type of service, time period or units of service, and service level agreement (SLA).
Service	VKB	Knowledge Management	V1.3 Capability Cards	Ability to manage knowledge articles, FAQs that provide detailed instructions to assist with issue resolution.
Service	VLN	Training & Onboarding	V1.3 Capability Cards	Learning program to train and assess competence of agents, as well as provide guided service capabilities resulting in decreased ramp time, enhanced onboarding experience and development of new skills.
Service	VPR	Remote Monitoring & Proactive Service	V1.3 Capability Cards	Monitoring of install base and proactively manage service for known issues, tracking all interactions related to the service issue.
Service	VQL	Service Quality & Supervision Analytics	V1.3 Capability Cards	Supervisor visibility, actionability and analysis of support contact center. Program for quality policy, benchmarks, assessment and analysis.
Service	VSS	Self Service	V1.3 Capability Cards	Publishing of formal knowledge, moderating and nurturing of crowd sourced knowledge from the community to empower customers, resolve issues, and deflect the direct cost of service.
Service	VSV	Feedback / Surveys / VOC	V1.3 Capability Cards	The request, collection and management of customer satisfaction, net promoter and other survey results after key interactions.
Service	VTM	Case Teaming	V1.3 Capability Cards	Unstructured collaboration between customers, partners, agents, experts and business entities (case and knowledge).
Service	VWA	Warranty Management	V1.3 Capability Cards	Management of warranty entitlements, customer warranty registration, customer policies, warranty claims and adjudication.
