Siemens Mobility – External Research Brief

Website: mobility.siemens.com | **Industry:** Rail & Transit / Transportation Technology | **HQ:** Munich, Germany (US HQ: Sacramento, CA) | **Founded:** 2018 (as standalone subsidiary; rail heritage dates to 1879) | **Company Size:** ~39,000 employees globally; 4,000+ in the US across 8 locations | **Revenue:** ~€11B (FY2024 est.); \$8.2B US-reported (ZoomInfo)

Company Overview

Siemens Mobility is a wholly owned subsidiary of Siemens AG, formally restructured as a dedicated division on August 1, 2018. It is one of the world's leading providers of intelligent transportation infrastructure, combining rolling stock, rail automation, electrification, digital software, and lifecycle services under a single operating entity. [1](#) The division serves transit authorities, national rail operators, freight carriers, and governments across more than 60 countries, with a particular emphasis on sustainable, electrified, and digitally managed rail networks. In the United States, Siemens Mobility has operated manufacturing facilities since 1984 and is a major domestic rail supplier, employing over 4,000 people and sourcing from more than 2,000 US-based suppliers to meet Buy America requirements. [2](#)

Core Products & Services

- Rolling Stock:** Intercity and high-speed trains (Velaro, ICE 4), regional and commuter trains (Mireo), metro and light rail (Inspiro, Avenio), trams, and hydrogen/battery-electric alternative-drive vehicles including the Mireo Plus H – which entered commercial passenger service in Germany in December 2024. [3](#)
- Rail Infrastructure & Signaling:** Automation systems (ETCS/ERTMS, CBTC, interlockings), electrification (catenary, substations), and the new cloud-based **Signaling X** platform – launched at InnoTrans 2024 – which unifies signaling systems via standardized APIs for intelligent diagnostics and management. [4](#)
- Digital & Software Solutions:** Operational management software, predictive maintenance platforms, digital twin technology, and the **Siemens Industrial Copilot AI** suite being extended into the mobility sector. Data Analytics Services and IoT-connected fleet monitoring are active product lines. [5](#)
- Turnkey & Systems Integration:** End-to-end project delivery combining rolling stock, signaling, electrification, and depot solutions – e.g., the \$754M HS2 signaling and electrification contract awarded in January 2025. [6](#)
- Customer Services & Lifecycle Management:** Maintenance contracts, warranty services, depot upgrades, parts supply, and field engineering – the area most directly relevant to the US field service operation. The Munich-Allach production and service center, opened July 2025 with a €250M investment, can service up to 500 rail vehicles annually. [7](#)
- Mobility-as-a-Service (MaaS):** Regional MaaS platform development, including collaboration on Quebec's multimodal transit application consolidating public, private, and shared transport services. [8](#)

Key Executives

Name	Title	Notable Quote or Signal
Michael Peter	CEO & Managing Director, Siemens Mobility	Contract extended for four additional years; signaled continued focus on digital rail and service growth 9
Beatrice Bock	CFO & Managing Director, Siemens Mobility	Appointed effective December 2025, succeeding Karl Blaim; joins from within Siemens AG 9
Roland Busch	CEO, Siemens AG (Chairman of Siemens Mobility GmbH)	Delivered Hannover Messe 2025 keynote calling for "AI-driven innovation to fuel industrial growth" 10
Peter Koerte	CTO & CSO, Siemens AG	Presented Siemens Industrial Copilot and AI/digital twin roadmap at CES 2025; driving AI integration across the mobility portfolio 11
Nick Corley	Head of Logistics, Siemens Mobility North America	Presented at Realize LIVE Americas 2025 on connecting logistics and manufacturing for large-scale US production investments 12

Recent Financial Performance

Siemens Mobility is a strong-growth segment within Siemens AG's Industrial Business. Key figures: 13 14

- **FY2024 Order Backlog:** €48 billion (as of September 30, 2024), of which €11B expected to convert to revenue in FY2025 — representing multi-year revenue visibility
- **Q4 FY2024:** Orders surged 47% year-on-year to €4.6 billion — a standout quarter driven by large infrastructure contracts
- **FY2025 Outlook (confirmed):** Comparable revenue growth of 8%–10%, profit margin of 8%–10%
- **Q1 FY2026:** Mobility orders up 10% on a comparable basis to €2.9 billion; Siemens group revenue rose 8% to €19.1B with Mobility contributing meaningfully 15
- **US Revenue Proxy:** ZoomInfo reports ~\$8.2B in US-attributable revenue 3
- Siemens Mobility is privately held as a subsidiary of Siemens AG (listed on Frankfurt Stock Exchange: SIE); standalone P&L is not publicly separated beyond segment reporting

Industry & Market Position

Siemens Mobility operates at the intersection of two high-growth markets: 16 17

- **Railway Management Systems:** Projected to grow from \$55.5B (2025) to \$76B by 2030 at 6.5% CAGR
- **Smart Railways:** Projected to grow from \$36.5B (2025) to \$54.3B by 2030 at 8.3% CAGR
- **Rail Asset Management:** Projected to grow from \$12.8B (2025) to \$17.6B by 2030 at 6.6% CAGR

Siemens Mobility is consistently ranked as a top-2 global rail supplier alongside Alstom, and is the dominant rail technology provider in North America by installed base. Key structural tailwinds include global urbanization, decarbonization mandates, government infrastructure investment (US IIJA, EU Green Deal), and the replacement of aging diesel and legacy signaling infrastructure. The company targets climate neutrality in its own operations by 2030. 18

Notable headwinds / reputational risks to be aware of: Deutsche Bahn ICE 4 shipment suspension in June 2024 due to component defects; London Piccadilly line Inspiro metro rollout delayed from late 2025 to H2 2026 due to testing complications. Both issues reflect the execution risk inherent in large, complex rail delivery programs. 19

Key Competitors

Competitor	Key Differentiator vs. Siemens Mobility
Alstom	Largest rolling stock manufacturer by revenue post-Bombardier acquisition (€18.5B FY2024/25); stronger in European mainline and global metro; backlog of €95B; aggressive in digital mobility and autonomous train technology 20
CRRC Corporation	World's largest rail equipment manufacturer by volume; Chinese state-owned; significant scale and cost advantage in rolling stock; limited US market access due to Buy America restrictions and federal security concerns
Wabtec (Westinghouse Air Brake Technologies)	Strong US market presence, particularly in freight rail, train control systems, and locomotives; a direct competitor in the North American services and signaling space 21
Hitachi Rail	Growing competitor in integrated signaling, rolling stock, and digital mobility; acquired Ansaldo STS (signaling); January 2025 acquisition of Omnicom strengthens digital asset management 22
Bombardier Transportation (now part of Alstom)	Legacy competitor now absorbed into Alstom; historically strong in North American commuter rail rolling stock — same customer base as Siemens Mobility US

Digital Transformation & Sales Process Signals

Siemens Mobility is executing an aggressive digital transformation agenda, both internally and as a product and services offering to customers.

AI & Industrial Copilot: At CES 2025, Siemens announced the extension of its **Industrial Copilot** AI suite into the mobility sector, enabling AI-assisted operations across maintenance, logistics, and fleet management. 11

"We're accelerating our path toward AI-driven industries through innovation and partnerships — combining software, automation and AI as a ONE Tech Company." — Roland Busch, CEO, Siemens AG, Hannover Messe 2025 10

Signaling X (Cloud-Based Rail Platform): Launched at InnoTrans 2024, Signaling X is Siemens' new cloud-native signaling management platform unifying multiple signaling systems via standardized APIs — a foundational infrastructure investment in digital rail operations. [4](#)

Digital Depot & Predictive Maintenance: Siemens Mobility is actively developing AI-powered depot inspection and predictive maintenance capabilities, including automated visual inspection tools featured at InnoTrans 2024. [4](#)

North America Manufacturing Investment: A \$220M investment in a new North Carolina advanced manufacturing and rail services center signals long-term US commitment and growing domestic production capacity. [5](#) Nick Corley (Head of Logistics, NA) presented publicly at Realize LIVE Americas 2025 on connecting logistics and manufacturing systems for large-scale US investment — a direct signal that supply chain and operations integration is an active internal priority. [12](#)

Salesforce Footprint (Internal Context): Siemens Mobility US already operates on Salesforce; the Gas Services and SieOps divisions within broader Siemens are live in production with Agentforce and AI Case Summaries (announced January 2026). The US field service operation is an active opportunity to extend the existing platform investment into purpose-built field service, asset lifecycle, and customer portal capabilities.

Data Gaps & Caveats:

- Standalone Siemens Mobility P&L financials are not publicly reported at the subsidiary level; all figures are derived from Siemens AG segment reporting
- US-specific revenue figure (\$8.2B) is ZoomInfo-sourced and should be treated as an estimate
- No direct executive quotes from Michael Peter or Beatrice Bock on digital transformation strategy were found in available public sources — LinkedIn or Siemens press room searches may surface additional commentary
